#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-3, 6-9, 11-12, 15, and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al. (6,006,050) in view of Hayashi. Watanabe et al. teaches performing a calculation on the developer remaining amount after warm-up (figure 6; column 10, lines 16-46; column 11, lines 15-20). Yoshinori does not discuss a display means, which is normally conventional on an image forming device.

Application/Control Number: 10/603,861

Art Unit: 2852

Hayashi teaches a display (figure 8). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the teaching of Hayashi with the image forming device of Yoshinori since it teaches a conventional display means for a conventional image forming device.

Watanabe et al. does not teach the claimed toner or a cleaner for the detector. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select the appropriate toner, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. In addition, the examiner takes official notice that a cleaner for detector in a developing device is well known in the art. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a cleaner with the detector of Watanabe et al. to obtain a clean detector to ensure proper detector readings.

### Allowable Subject Matter

4. Claims 4-5, 10, 13-14, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 16 is allowed.

### Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/603,861 Page 4

Art Unit: 2852

#### Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Horikawa teaches a cleaner for a toner detector.

## **Contact Information**

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quana Grainger whose telephone number is 571-272-2135. The examiner can normally be reached on weekdays between the hours of 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Arthur Grimley can be reached on 571-272-2136. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
